

UNIKONET, UNIKONET PLUS'

Description

Unikonet and **Unikonet Plus'** are liquid descaling and cleaning products with a neutral ph. They are non-aggressive when cleaning floors and can be used on varnished floors for everyday cleaning.

Prefer using Unikonet for varnished floors with glossy finish (Unikoprotect 110) or satin (Unikoprotect 100) in order to keep a slightly wet patina.

On the other hand, use Unikonet **Plus'** with floors varnished with Unikoprotect 140 NV or with a matt finish (Unikoprotect 120) in order to maintain matt finish.

Tip: if you wish to progressively make the patina more glossy on a matt varnish, you can also use Unikonet for everyday cleaning. Both these products contain neither acid, ammonia, nor alcohol based solvents. No rinsing needed.

Method :

In 5 litres of water, mix in the equivalent of one dose from Unikonet can

Mix 3 % of Unikonet plus' in 5 litres of water, that's to say 15cl

Cleaning must be done with appropriate tools such as micro fibre brooms
